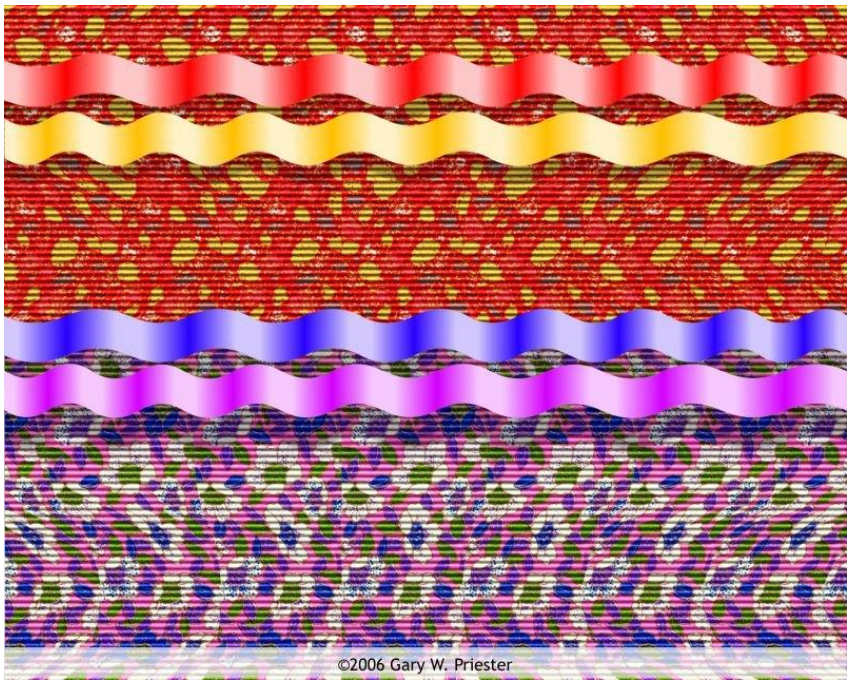
Stealth Communism:
Its goals, tactics, and fallacies

Copyright Brian Fraser 2023; updated 1-27-2026

The Issue of Perception

This article is intended to give the reader more practice in "perceiving the invisible" — a theme that I have used repeatedly in my physics articles such as "*Beyond Einstein: non-local physics, 7 th ed*" (https://www.academia.edu/124905145/Beyond_Einstein_non_local_physics_7_th_ed) But the development here is somewhat different. In the physics articles, a physicist could view an equation, such as $E = mc^2$, and miss several important deep meanings implied, even though they were right under the physicist's nose. In contrast, this article deals with an altered state of mind that is normally not detectable, but which produces altered perceptions and beliefs.

First consider an ordinary example of a simple "auto stereogram". These are two-dimensional images that when viewed properly, can create the optical illusion of a three-dimensional scene. Only one image, and no equipment is used to accomplish this effect. An example is given below:



To see the 3D effect, the viewer must stare through the image (focusing behind it) for a minute or two and let the visual system interpret the image as 3D. With a little practice and patience most people can see the effect. But some people, even after considerable effort, only see something that looks like an uninteresting flat piece of wallpaper. Some will even insist that there is no such "3D image", that people are just imaging things—like the guy who sees the face of Jesus on a toasted cheese sandwich, or the face of the Devil in the curling smoke of a burning building. Or the guy at home who hears low level voices like a radio playing, but barely audible. He can't make out any words. And he notices that the "talking" stops when he turns off the air conditioning fan.

That latter phenomenon is called “pariedolia”. It is the perception of patterns in randomness where none exist. (Why We Hear Voices in Random Noise - Nautilus) This can be a serious problem in astronomy and general science. Here is an example:

> . . .sometimes these tests can find apparent correlations that are just the results of natural fluctuations, or “noise,” in the system. One researcher in 2009 duplicated one such experiment, on the recognition of facial expressions, only instead of human subjects he scanned a dead fish — and found “significant” results. http://news.mit.edu/2012/explained-sigma-0209

Seeing things that are not real is a problem, but here we are more concerned with NOT seeing things that ARE real.

A good example can be found in the Bible.

Jesus, during his last days, was telling his disciples that Messiah was to be betrayed and crucified like a notorious criminal. But they did not understand. In their minds, Messiah was the coming great Prince who was to deliver Israel from Roman rule, and restore the Kingdom to Israel. They had seen Jesus raise people from the dead, cure leprosy, restore sight to the blind, hearing to the deaf. But how could he be the Messiah if he was going to die? Judas apparently became convinced that he could not be the Messiah, as popularly conceived, and later betrayed him. (Matthew 16:21-23; Mark 9:31-32)

We all know what happened. Jesus was mistreated and crucified like a notorious criminal This caused great consternation and confusion in his disciples.

So here we have an example of the *very Son of God speaking, in person, face to face, with his disciples and telling them plainly what was about to happen.* But due to their preconceptions, which they did not realize they possessed, they missed the message completely.

Can something like this happen to you? Can you completely miss an important message coming from an authoritative, credible source? Might you have some strongly held beliefs that are impervious to facts? What about controversial religious doctrines like the Trinity and Eternal Hellfire? The most salient characteristic of mass formation (below) is that it makes people radically blind to everything that goes against the narrative they believe in.

Recognizing the Presence of Psychological Operations

You depend on your mind, trained by discernment and past experiences, to be able to sort out the true from the false. But what if your *mind itself* is attacked in ways you do not expect or which you cannot detect? Maybe you are distracted by powerful emotions like fear or guilt. Maybe you are expecting the appearance of a definite, clearly identifiable “enemy” but instead the “enemy” is a slow permeation and infiltration of ideas, which, on the surface seem reasonable and desirable, but down deep are pernicious and evil.

How would you know if you are the target audience of a Psychological Operation if you cannot trust your mind? Look for these tactical signs:

1. The presence of fear, guilt, confusion, anxiety, urgency, repetition.
2. Use of division, anger, blame, isolation, meaningless or irrational behavior
3. The use of ridicule and unfounded accusations of disinformation, "conspiracy theories", etc.
4. The widespread use of censorship, suppression of contrary viewpoints and information.
5. The use of bribes, coercion, mandates, threats of violence, intimidation.
6. The government breaking its own rules in the interest of "national security", "safety", etc.
7. Efforts to break up any sort of a sense of community (e.g. closure of churches, clubs, etc.).
8. Centralized control (banking, commerce, industry, education healthcare); no private property
9. Political Correctness (invented by the Communists in the 1930s).
10. Creation of a self-perpetuating "virtue signaling" apparatus.
11. Creation of "enemy groups" (e.g. "anti-vaxxers", "conspiracy theorists", "pandemic of unvaccinated")
12. Major "News" programs heavily scripted by Public Relations firms ("cookie cutter news")

But these are mere tools of the trade. The ultimate goal is to form a population under the influence of "Mass Formation Psychosis". This is well known in human history, although it has been known by different names such as "mob psychology". Historically, has been used by dictators and totalitarian regimes. Here is an operational definition used in commerce:

> Psychosis is when people lose some contact with reality. Mass formation psychosis is when a large part of a society focuses its attention to a leader(s) or a series of events and their attention focuses on one small point or issue. Followers can be hypnotized and be led anywhere, regardless of data proving otherwise. A key aspect of the phenomena is that the people they identify as the leaders – the one's that can solve the problem or issue alone – they will follow that leader(s) regardless of any new information or data. Furthermore, anybody who questions the leader's narrative are attacked and disregarded.
>
> When followers start to participate in a strategy to deal with the object of anxiety, new social bonds typically emerge and people change from a highly aversive negative mental state and isolation, to the exact opposite to the extremely high-level of connectedness that exists.
> https://www.swfinstitute.org/news/90470/what-is-mass-formation-psychosis
> https://www.nasdaq.com/articles/the-doctors-prescription-for-mass-formation-psychosis

Mass formation psychosis is a form of mass hypnosis that emerges when specific conditions are met, and almost always precede the rise of totalitarian systems. *The Psychology of Totalitarianism*, Mattias Desmet, 2022, (Amazon)lists these four conditions:

1. Widespread loneliness and lack of social bonding, which leads to:

2. Experiencing life as meaningless, purposeless and senseless, and/or being faced with persistent circumstances that don't make rational sense, which leads to:

3. Widespread free-floating anxiety and discontent (anxiety/discontent that has no apparent or distinct cause), which leads to:

4. Widespread free-floating frustration and aggression (frustration and aggression have no discernible cause), which results in feeling out of control

Under mass formation, a population enters a hypnotic-like trance that makes them willing to sacrifice anything, including their lives, their marriage, their freedom, their children, their wealth—*anything*. The normal "social bonding" that takes place between individuals is replaced with "social bonding with the collective". The collective then tries to blame the above four items on an "enemy." In the United States, for example, the COVID pandemic has been labeled, with the help of Mass Media, as "*a pandemic of the unvaccinated*" by the President and other prominent officials in responsible, trusted positions. This has resulted in all sorts of cruelties to the unvaccinated such as loss of employment, demands to reduce access to shopping centers, University education, Medicare and Social Security

benefits, access to banking, etc. Loss of employment had further derivative effects such as personnel shortages, supply chain problems, and food shortages. These did not deteriorate into the abject, heinous atrocities so common with totalitarian regimes like Nazi Germany, Maoist China, and Imperial Japan. But the recent developments in the United States, Australia, and Canada clearly show that such things can happen even in Western democracies.

The Characteristics of Stealth Communism

Communism, in Western societies, takes the form of a stealthy, deluding influence. It is like a fog bank that slowly and silently creeps in over the landscape. It impedes progress and visibility in every direction but offers nothing to come to grips with. It even seems "normal". But it is like carbon monoxide poisoning. People know something is wrong but their minds are so impaired they cannot figure out what it is. The "enemy" is not visible.

Tactics of Communism

Communists can use any kind of mayhem and turmoil to further their goals, and turmoil is easy to create. Democratic or constitutional republics are complex and fragile. Making them work is like walking a tightrope. Any deviation to the right or left is to communism's advantage. To make matters worse, there is a guy (a communist) at one end of the rope silently moving it back and forth trying to keep us all off balance. Diligence and discernment are required to stay on course.

Communists are extreme atheists. As such they have no moral compass. The "means" do not matter, only the "end" result. Lying, stealing, murder, assassination, abduction, intimidation, violence, disinformation, etc. are all short-cuts to their goals and are actually regarded as VIRTUES. These are regarded as virtues because they enable shortcuts to combat the influence of the ugly, stinking, reeking, greedy Capitalist aggressor swine-dog infidel war-mongers.

Communists make wonderful promises that cannot be kept and are not even intended to be kept. Again, lying is a virtue in Communism and they use this tactic frequently, much to the bewilderment of Western governments, naïve politicians, and students. Unlike bad roommates, devoted Communists cannot be reformed.

Communists try to accelerate proposed changes before the population is ready for them (e.g.: independence from colonialism, conversion to green energy, . . .). They promise Communism as an escape from the resulting turmoil. For a fearful public this tactic is quite effective.

If a Communist is accused of a serious crime, he will vigorously assert his innocence, claim that he is being unfairly singled out, persecuted, mislabeled, misunderstood, etc.

Communists will deny war crimes. The law of the jungle is not a war crime. Killing the alligators that are trying to eat you is a virtue, not a crime.

Communists accuse the enemy of the same crimes they are committing. They are also paranoid and insecure for the same reason.

Communists use intimidation. "You better grant our demands or there might be a nuclear war." The Western response has historically been "Don't upset the crazy Communists", "Peace at any price", "We must co-exist with the Communists, like a bad roommate", "Be nice to them and they will start to like and trust us". Western leaders have lacked the insight, courage, resolve, and intensity to put down Communism. Instead, they think the way Communists want them to think: parity, containment, accommodation, stalemate, compromise, "peace through disarmament". . .

Goals of Communism

Americans currently need a lot more insights on Communist GOALS and TACTICS. I suggest the book "*The Naked Communist*" by W. Cleon Skousen. It is well written, very pertinent, easily understood, and somewhat strangely, makes courses in history, government, economics, and religion far more interesting and personally relevant. (I am a retired engineer. In college I was not very interested in those topics). The reason for the bewildering, crazy, divisive things going on in the U.S.A. becomes apparent after reading this list. Note that the schemes are "nothing personal", but are instead elements of a scheme or ***system*** for a global conquest.

Skousen lists 45 goals of the Communists. Over the past 60 years the Communists have patiently succeeded in achieving 44 of the 45 goals. One more to go and someone can turn the key and activate "The Apparatus".

1. U. S. acceptance of coexistence as the only alternative to atomic war.
2. U. S. willingness to capitulate in preference to engaging in atomic war.
3. Develop the illusion that total disarmament by the United States would be a demonstration of moral strength.
4. Permit free trade between all nations regardless of Communist affiliation and regardless of whether or not items could be used for war.
5. Extension of long-term loans to Russia and Soviet Satellites.
6. Provide American aid to all nations regardless of Communist domination.
7. Grant recognition of Red China. Admission of Red China to the UN.
8. Set up East and West Germany as separate states in spite of Khrushchev's promise in 1955 to settle the Germany question by free elections under supervision of the UN.
9. Prolong the conferences to ban atomic tests because the U.S. has agreed to suspend tests as long as negotiations are in progress.
10. Allow all Soviet satellites individual representation in the UN.
11. Promote the UN as the only hope for mankind. If its charter is rewritten, demand that it he set up as a one-world government with its own independent armed forces. (Some Communist leaders believe the world can be taken over as easily by the UN as by Moscow. . . .)
12. Resist any attempt to outlaw the Communist Party.
13. Do away with all loyalty oaths.
14. Continue giving Russia access to the U.S. Patent Office.
15. Capture one or both of the political parties in the United States.
16. Use technical decisions of the courts to weaken basic American institutions by claiming their activities violate civil rights.
17. Get control of the schools. Use them as transmission belts for socialism and current Communist propaganda. Soften the curriculum. Get control of teachers' associations. Put the party line in textbooks.
18. Gain control of all student newspapers.
19. Use student riots to foment public protests against programs or organizations which are under Communist attack.
20. Infiltrate the press. Get control of book-review assignments, editorial writing, policy-making positions.
21. Gain control of key positions in radio, TV and motion pictures.
22. Continue discrediting American culture by degrading all forms of artistic expression. An American Communist cell was told to "eliminate all good sculpture from parks and buildings, substitute shapeless, awkward and meaningless forms."
23. Control art critics and directors of art museums. "Our plan is to promote ugliness, repulsive, meaningless art."
24. Eliminate all laws governing obscenity by calling them "censorship" and a violation of free speech and free press.
25. Break down cultural standards of morality by promoting pornography and obscenity in books, magazines, motion pictures, radio and TV.
26. Present homosexuality, degeneracy and promiscuity as "normal, natural, healthy."
27. Infiltrate the churches and replace revealed religion with "social" religion. Discredit the Bible and emphasize the need for intellectual maturity which does not need a "religious crutch."
28. Eliminate prayer or any phase of religious expression in the schools on the ground that it violates the principle of "separation of church and state."
29. Discredit the American Constitution by calling it inadequate, old-fashioned, out of step with modern needs, a hindrance to cooperation between nations on a world-wide basis.
30. Discredit the American founding fathers. Present them as selfish aristocrats who had no concern for the "common man."
31. Belittle all forms of American culture and discourage the teaching of American history on the ground that it was only a minor part of "the big picture." Give more emphasis to Russian history since the Communists took over.
32. Support any socialist movement to give centralized control over any part of the culture—education, social agencies, welfare programs, mental health clinics, etc.
33. Eliminate all laws or procedures which interfere with the operation of the Communist apparatus.
34. Eliminate the House Committee on Un-American Activities.
35. Discredit and eventually dismantle the FBI.
36. Infiltrate and gain control of more unions.
37. Infiltrate and gain control of big business.
38. Transfer some of the powers of arrest from the police to social agencies. Treat all behavioral problems as psychiatric disorders which no one but psychiatrists can understand or treat.
39. Dominate the psychiatric profession and use mental health laws as a means of gaining coercive control over those who oppose Communist goals.
40. Discredit the family as an institution. Encourage promiscuity and easy divorce.
41. Emphasize the need to raise children away from the negative influence of parents. Attribute prejudices, mental blocks and retarding of children to suppressive influence of parents.
42. Create the impression that violence and insurrection are legitimate aspects of the American tradition; that students and special-interest groups should rise up and use "united force" to solve economic, political or social problems.
43. Overthrow all colonial governments before native populations are ready for self-government.
44. Internationalize the Panama Canal.
45. Repeal the Connally Reservation so the U.S. cannot prevent the World Court from seizing jurisdiction over domestic problems. Give the World Court jurisdiction over nations and individuals alike.

The list above is reproduced from "*The Naked Communist*" by W. Cleon Skousen (1961). Used without permission under Fair Use for non-commercial and educational purposes.

Defeat of Communism

Totalitarian governments are either destroyed by war (Nazi Germany, Imperial Japan) or collapse because of their own corruption (Soviet Union). But there is another alternative.

Communism can be defeated without war because it has certain weaknesses:

1. Communism does not meet the needs of the people. Productivity and quality of services are inadequate. Popular riots often result. Communism would fall if Western democracies would stop aiding Communist societies, and stop buying cheap goods produced by slave labor, unsafe work conditions, severe environmental pollution, industrial espionage . . .

2. Communist countries have been recognized and given powerful positions at the United Nations. If Article 4 of the UN Charter were strictly applied, violence-promoting regimes would be kicked out of the UN, which could no longer be used as a listening post and propaganda platform. (www.un.org/en/about-us/un-charter/full-text)

3. The Communist party in the United State is less like a political party and more like a highly organized group of mobsters whose declared and published tactics involve spreading violence, disinformation, mayhem, and centralized control. They arouse the people to illegal acts, but then disappear into the woodwork and let the people take the blame. This leads to corruption, diversion of government funds, and black market opportunities. That the U.S.A. formally recognizes such a criminal organization within its borders is incomprehensible!

4. The "solutions" communism offers are negative. Whereas Capitalism struggles to find solutions to its real problems, Communism eliminates the expression of the problem. Example: If a village is causing trouble, the Communists kill all the farmers and laborers, confiscate all stored foods, then leave and isolate the village. The people in the village starve to death. "No more people, no more problems." A huge network of secret police is required to maintain this kind of terror. Yet the basic problems remain unsolved and popular uprisings often take place.

5. Communists are paranoid. The methods they use against Western governments, they also use amongst themselves. They continually wonder who is going to poison them, attack them, swindle them. Their methodologies have taught them to trust no one, not even fellow Communists. Communism has the seeds of its own destruction.

6. One salient difference between totalitarian governments and dictatorships is that dictatorships eliminate their enemies. After a few years, things usually settle down to some semblance of normality Totalitarianism, in contrast, requires enemies. If there aren't any, they invent some (usually external) and the turmoil and total control never end. This results in a colossal waste of national resources.

7. Communists depend on the "decadent stupidity" and the "useful idiots" of Western governments to promote their agenda. If people were aware that they are being "played", communism would never succeed.

Conclusion

The presence of psychological operations such as stealth communism and mass formation can be detected by the appearance of specific events taking place within a society. People can see what is happening as the tactics are understood and the results become visible.

This leaves people with a choice. In the U.S.A., for instance, the people can choose to live under a Constitutional Republic or under a totalitarian government such as communism (also known as "totalitarian democracy") . Otherwise, the choice will be made by "The Apparatus".
